## **PROJECT DESCRIPTION AND TEAM MEMBERS**

Viewing and Paying Taxes Paid to the State and Municipalities on a Website:

Firms and individuals have to constantly pay taxes. Some of the tax debts are displayed on e-government, some on the municipality's website and some on the interactive tax office. That's why the payments differ. We are designing a website where we can view and pay the debts to the state and the debts to the municipalities on a single screen.

The database and information of this website will be linked to e-government. Firms and individuals prepaid taxes, future tax debts will be displayed. They will also be able to assign automatic payments from the bank upon request. When the debts are due, information will be given via e-mail and SMS.

Some of the tax debts are displayed on e-government, some on the municipality's website and some on the interactive tax office. That's why the payments differ.

Hamza YAVUZ – 17030411056

## WORK BREAKDOWN STRUCTURE FOR ELECTRONIC TAX ADMINISTRATION

## CONDUCT RISK ANALYSIS

<p><b>Communication Problems:</b> There can be a communication problem between project team and developer. For that reason, what customers wants don't match what developers do.</p> <p><b>Financial Problems:</b> Determined budget doesn't match up coming budget.</p>	<p><b>Safety, Confidentially, Integrity, Avability</b> can be seen as a safety problem.</p> <p><b>Data Integration:</b> There can be problems of data integration between receiver and sender.</p>
<p><b>Bug and Errors:</b> It is important to deal with them but not that much important.</p>	<p><b>Worker Circulation:</b> Some workers don't have enough ability to do something.</p> <p><b>Threats and Attacks:</b> In a big project it is common that threats and attacks can be seen.</p>

### Solutions:

1. Set the goal for risk analysis.
2. Collect data to identify.
3. Add value to risks.
4. Identify highest priority risk.
5. Develop a plan to mitigate these risks.
6. Follow through with plan.
7. Review the effect of the plan.

## COMMUNICATON MANAGEMENT TABLE

<p><b>END-USERS:</b> Users have to be satisfied from the servers because they will be the ones who are the users.</p>	<p><b>PROJECT-TEAMS:</b> Project teams have to be satisfied because they will be the ones who will generate the project to deal with it.</p>
<p><b>DEVELOPERS:</b> It is not necessary that developers because they will just code.</p>	<p><b>T.C. DIGITAL TRANSFORMATION OFFICE:</b> We have to give them information because they will be the ones who should be informed.</p>

## RACI MATRIX OF ELECTRONIC TAX SYSTEM

Project Steps	Abdulkerim Ahmet ÜNAL	Arif ESEN	Hamza YAVUZ	Tunç MEDENİ
Project Management	Accountable	Informed	Responsible	Consultant
System Engineering	A, I	I, R	A, R	C
Software	C, R	I, A	R, I	C
Hardware	R, I	I, A	R, I	C
Deliverables Management	I, A, R	I, A	A, I	C
System Tests	R	I, A	R, I	C
Support Services	A	I, R	A, R	C
Installation	C, A	I, R	A, R	C

## **BUDGET PLANNING EXPLANATION**

As team members, we decided to choose 'the percentage breakout method' when we were doing the budget planning for our ELECTRONIC TAX MANAGEMENT SYSTEM. The reason why we have selected it is because we wanted to break down our household income into percentages, then plan our spending and savings accordingly.

In that budget planning method, we have selected one of the most common percentage breakdowns, which is 50/20/30.

50% means we have budget no more than 50% of our income goes toward our priority needs.

What our priority needs include are

- \*Staffing
- \*Software
- \*Hardware
- \*Outsourced services
- \*Maintenances
- \*Data center costs
- \*Utilities

20% means we have budget no more than 20% of our income goes on requests and non-essential expenses.

What our requests and non-essential expenses include are

- \*Better staff
- \*More quality hardware
- \*Better software
- \*Larger database
- \*Better host device
- \*Credences of team members

30% means we have budget no more than 30% of our income goes toward savings and debt payment.

What our savings and debt payment include are

- \*Remote working

- \*Performance based payments

- \*Live in the cloud for database

- \*Using open source tools

- \*Outsourcing

This is how our income and expense tables.

## BUDGET PLANNING

50% - PRIORITY NEEDS	PLANNED
Staffing	250.000
Software	5.000
Hardware	20.000
Outsourced Services	15.000
Maintenances	50.000
Data Center Costs	100.000
Utilities	10.000
<b>TOTAL (₺)</b>	<b>450.000</b>

20% - REQUESTS AND NON-ESSENTIAL EXPENSES	YES	NO	PLANNED
Better Staff		X	
More Quality Hardware	X		15.000
Better Software	X		7.000
Larger Database	X		20.000
Better Host Device	X		20.000
Credences of Team Members		X	
<b>TOTAL (₺)</b>			<b>62.000</b>

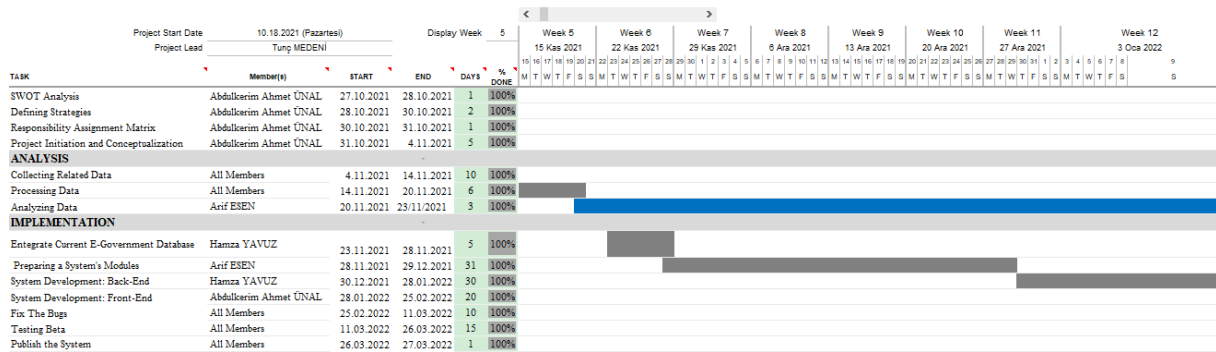

30% - SAVINGS AND DEBT PAYMENTS	YES	NO	PLANNED
Remote Working	X		50.500
Performance-Based Payments		X	
Live in the Cloud for Database	X		20.000
Using Open Source Tools		X	
Outsourcing		X	
<b>TOTAL (₺)</b>			<b>70.500</b>

<b>TOTAL (₺)</b>	<b>582.500</b>

# GANTT CHART

Gantt Chart Template © 2009-2019 by Vener42.com

Gantt Chart Template © 2009-2019 by Vener42.com

These are our Gantt Chart's screenshots. We created our Gantt Chart from Excel, but Turnitin could not accept the xlsx file. Also, in our Gantt Chart Template, you should select the week number for display the weeks. So, that's why there are screenshots more than one.

## BALANCE SCORE CARD

	OBJECTIVES	MEASURES	TARGETS
FINANCIAL	<b>Maintain Financial Balance</b> Cutting essential and non-essential expenses Creating a budget to track expenses	Hiring freelancer Using budget managing tools	75% 100%
	OBJECTIVES	MEASURES	TARGETS
USERS	<b>Satisfying users</b> Creating a simple user interface Reaching all the potential users	Using minimalist templates Making the system available for all devices	100% 80%
	OBJECTIVES	MEASURES	TARGETS
INTERNAL	<b>Improve service quality of the system</b> Having a large database Having a payment system for each method	Using a good database server Integrating the system with all payment method	90% 90%
	OBJECTIVES	MEASURES	TARGETS
LEARNING	<b>Maintaining the learning and growth strategies</b> Making the employees work better Providing better opportunities for employees to work better	Hiring consultants Improving hardware and software	90% 70%
	OBJECTIVES	MEASURES	TARGETS

## KEY PERFORMANCE INDICATORS

Business Objectives	KPI 1	KPI 2	KPI 3
<b>Data Integrity</b>	Transferring data with faultless from other databases	Cleaning the data before the process it	Uploading and updating the database into the cloud system
<b>Uninterrupted Service</b>	Controlling and updating databases	Making the system available for all devices	Well designed and easy to use
<b>Provide the System to All Clients</b>	Using minimalist templates	Having a easy usable interface	Readily accessible contact and location
<b>Time Saving for Clients</b>	Optimized for Search	Removing unnecessary contents	Having easy and fast payment options

Vision	Mission
To make people's daily work easier and faster	To make the tax payment administration work better and easier for everyone who can access the internet throughout one system.
